ÆTERNA·DESIGN

Aeterna Design presents its Art Design collection with the aim of bringing a fragment of Rome into private and public spaces.

The collections were born after a series of journeys, experiments and ideas that evolved over the years. Each painting is unique for the specificity of its cobblestones, for the cut, the color, the format and above all for the concept behind each production.

For this reason, each work has a specific numbering; This confers greater value and uniqueness to its limited edition creations.

AET ERNA DESIGN

Aeterna Design is the fruit of an idea Pietro Causati and his collaborator Alfredo Visca and thanks to the support of their advertising agency Made in Genesi they manage to combine design with the tradition and history of Rome.

Thus, the Aeterna Design brand came to life, in the hopes of becoming, over the years, a reference point able to highlight and promote the Eternal City in the world, through one of its most recognizable icons: the Sampietrino cobblestone. The production process starts with the recovery of original cobblestones, that have been abandoned, left in quarries or in private warehouses and giving them a new life.

All this is possible thanks to the collaboration of invaluable craftsmen who shape the stone to transform it into an object of renewed beauty. This is how our lighting products and home decor and art design accessories come to life.

The project was developed in collaboration with the advertising agency Made in Genesi.

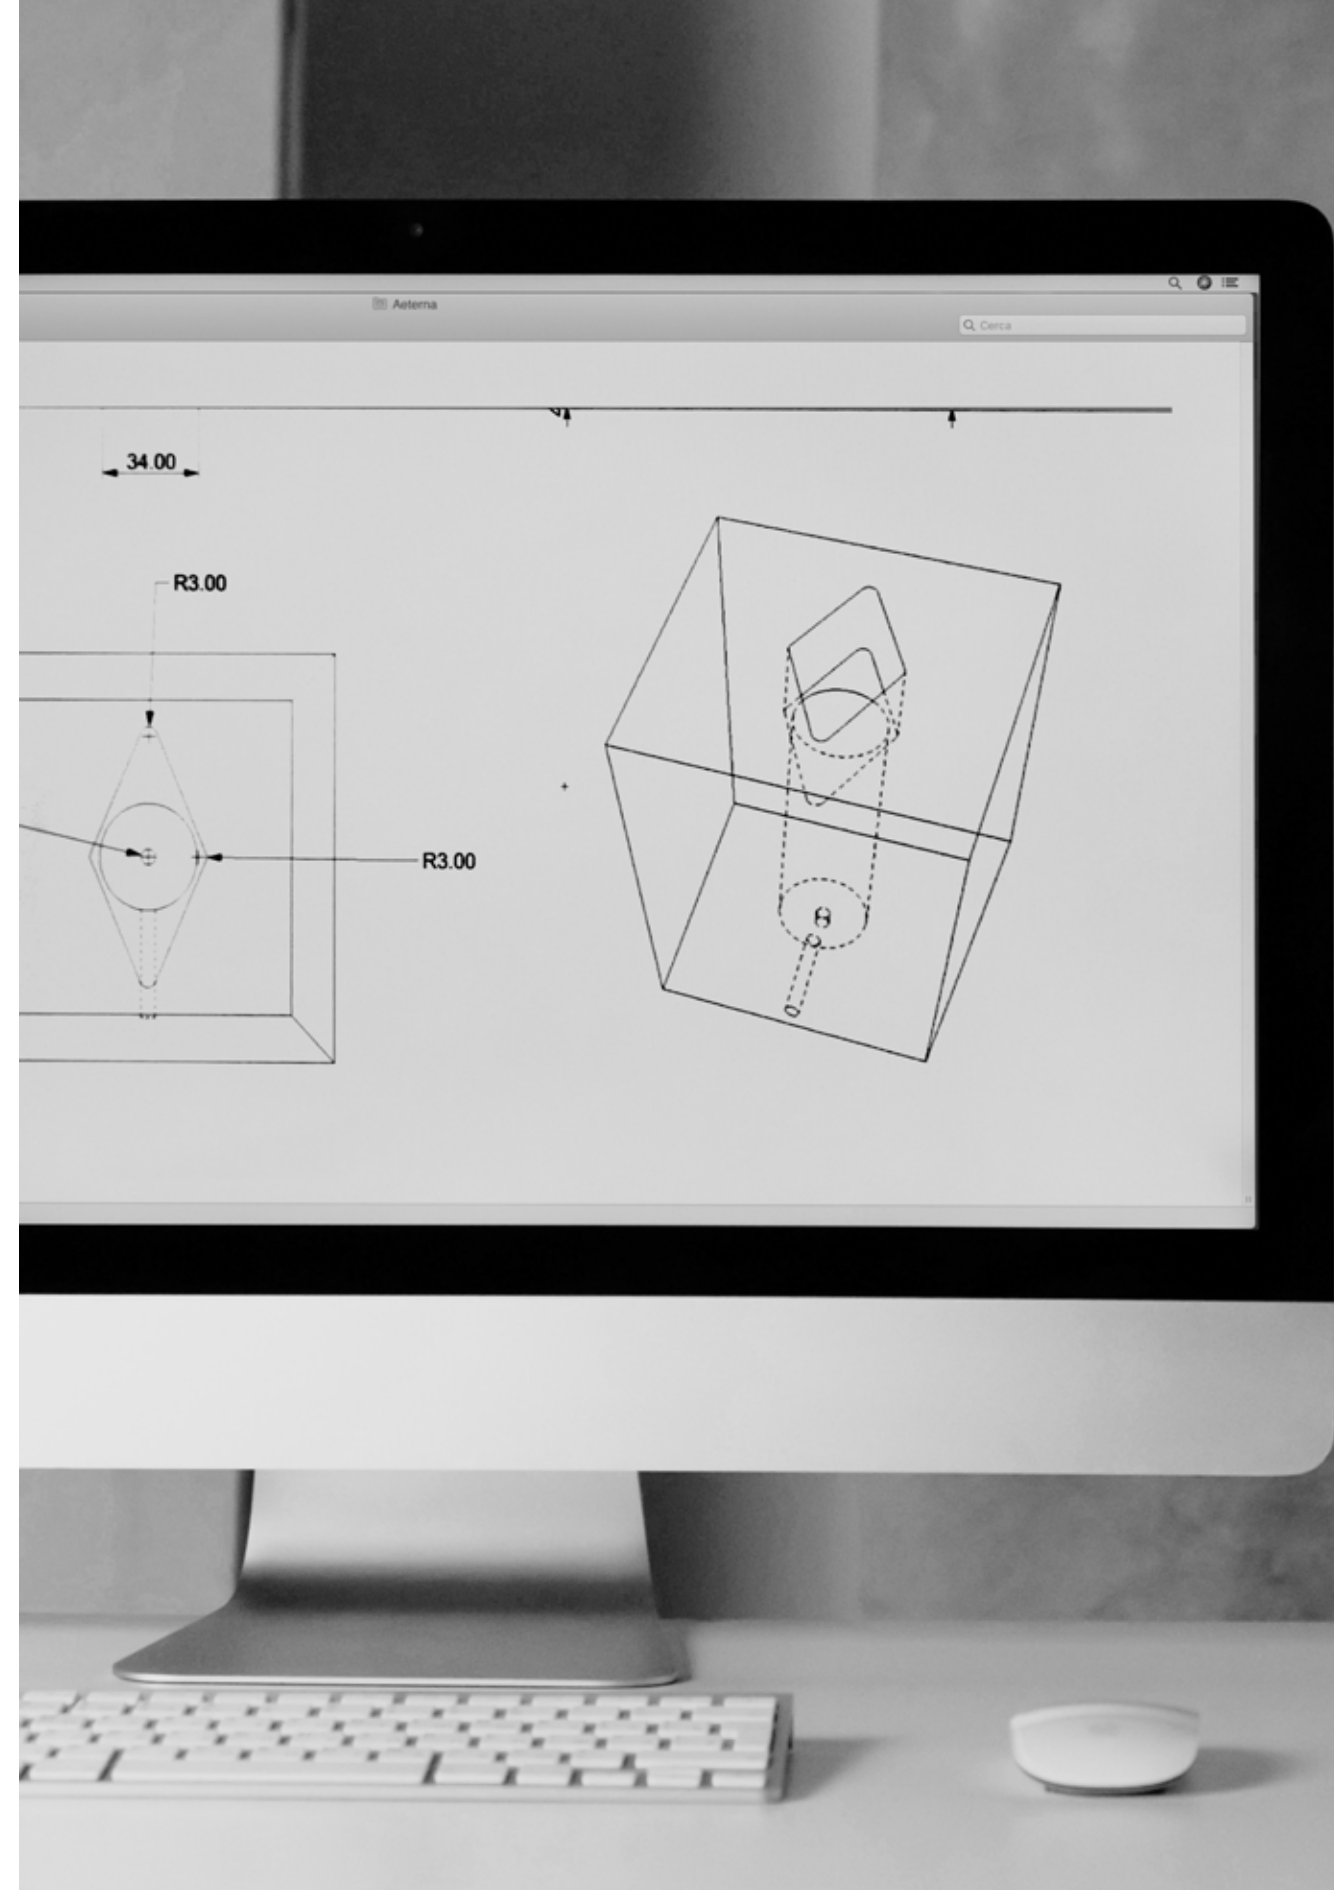

A project Made in Italy to tell the story of Rome. When the recovery of a cobblestone is accompanied by the design of a new product, the moment is always one full of emotions.

The concept and idea start from market research that suggests what the next production item should be: if, for example, it will be a lamp, bluetooth speaker or a painting. Once the object has been chosen, the stone polishing phase begins, during which the identity of this new product begins to be modeled.

Each cobblestone tells the story of Rome, its grandeur and its eternal character. Each element represents an iconic place in the city such as for example the Colosseum, Piazza Navona or the Pantheon.

Each work of art is made exclusively by hand by Roman artist Pietro Causati, with the collaboration of a range of artists and creatives, inside the production workshops of the Aeterna Design

All the materials used in the creation, assembly, and finishing phases are of Italian origin, Aeterna Design is in fact 100% Made in Italy, with a specific focus on Made in Rome. The charm of the cobblestones derives above all from their antiquity which oscillates between seventy and one hundred years of history depending on the lot the company has bought from quarries and private warehouses, this gives the new products greater value and prestige.

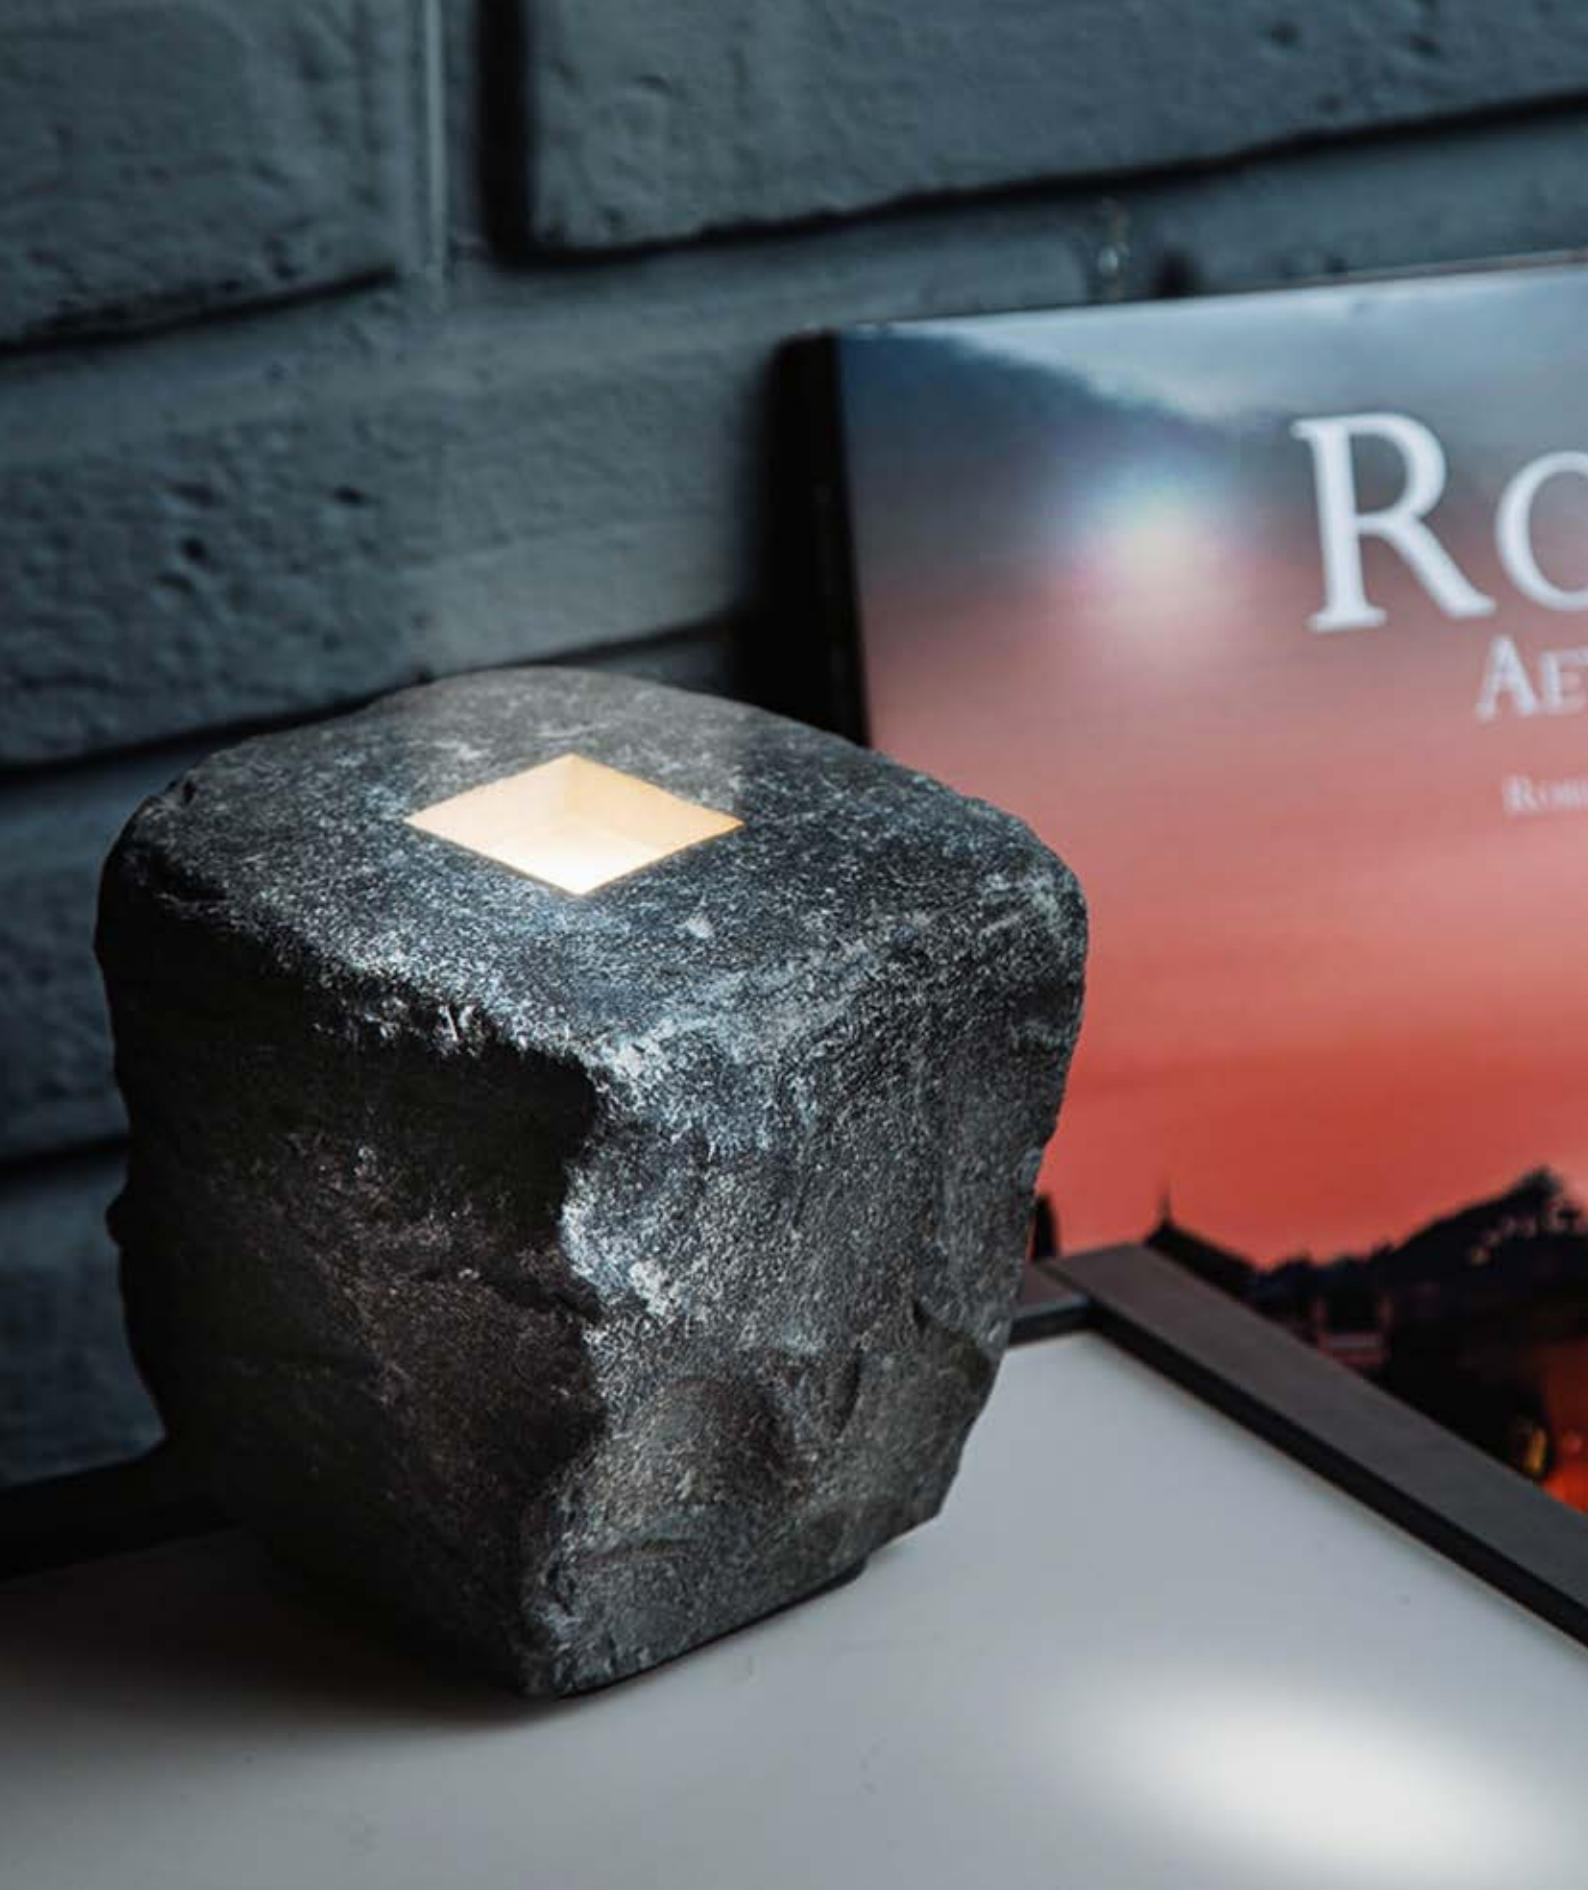

P R O D U C T D E S I G N
C O L L E C T I O N

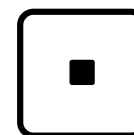

For those who love Rome, Aeterna Design offers an object which is both personal and unique like the history of the city. And it translates it into in light, art and furniture accessories to collect and keep forever. From the depths of the earth, the pavings of history inspire the transformation of these authentic Roman cobblestones, purchased by the company in quarries and storage spaces in private villas.

For us working stone means giving a second life to objects that are precious and full of history like cobblestones.

This gives birth to a series of furnishing accessories, lamps, musical objects, mini collectible paintings, to give a new shape to your environment: home, office, hotel.

In 2023, the company has been studying and prototyping a line of Home Design inspired by the Roman style, with the "Roman Sampietrino" once again at the heart.

The Aeterna Design house takes shape with a tall bookcase, a console, a coffee table and a living room armchair, all strictly Made in Italy.

C I R C O M A S S I M O

This armchair has been designed with a sampietrino shaped seat and a circular backrest that wraps the armchair on 3 sides creating a backrest and armrests. The center of the armchair is made of sampietrino-shaped wood, upholstered in various materials such as fabrics and leathers according to customer requirements, available in various colors.

Art Design is born when an object abandons its functional purpose and meets art, while maintaining its usefulness. Starting from this principle, the company aims to combine artistic research and design in a singular way by merging aesthetics, history and innovation. For this reason, designers, artisans and artists are often called upon to collaborate with each other during the creative process.

Starting from the stone that is so durable and eternal, in contrast with the fluidity of our time, as Peter declares “what fascinated me from the beginning of this journey was being able to work the stone to transform it into a new object that can live forever.”

L ' O R I G I N E

A painting represents the first intuition of creative director Pietro: the tops of original cobblestones are arranged on a honeycomb aluminum slab to perfectly recreate the cobblestone tiles in the center of Rome.

Offering the mood of the city and a piece of urban life, this painting will personalize any room of the house with a unique style. This work allows the viewer to identify his own Roman memory in the piece.

L A S T R A D A

The creative director's insight Pietro Causati collects the cobblestones in a frame. The tops of the original cobblestones have been arranged on a honeycomb aluminum slab to recreate the cobblestone tiles in the center of Rome. The metal slots allow safe anchoring in indoor and outdoor environments. The road stripes, in the three representative colors "Yellow No Parking," "Blue Parking," and "White No Pay," enrich the creation. The piece becomes a fragment of city life: La Strada is a visual narrative of the center of Rome whose title, "La Strada," calls to mind Fellini's masterpiece by the same name and the rules that the colors of the stripes determine.

PIETRA EACQUA

The stone and the colors of the water recount a new universe. In this work, stylistically different from all the others, the creativity of designer Pietro Causati decontextualizes the basalt to create a new message. The original tops of the cobblestones are arranged on wooden planks with a non-uniform blue paint that recreates the effect of sea water. A work with great breadth, which celebrates fluidity, matter and natural elements.

Aeterna Design kicks off a Corporate Brand Design Collection.

The original piece is declined with the different official logos of some Italian and international brands. Such as the case of Leo Pharma, a Danish multinational pharmaceutical company; Romana Diesel, the largest IVECO dealership in Rome and Lazio or for the well-known Italian wine company Marchesi Antinori. Creating bonds is part of the Roman spirit for this reason Aeterna Design wants to highlight, through its projects, various important relationships starting from the internal spaces of Italian companies.

LEO PHARMA

A collector's piece, conceived and creative entrepreneur Alfredo Visca who takes up the original idea of transforming the tops of the cobblestones into paintings to reproduce, in a piece of art, the original Roman flooring. At the center of the picture we see, in fact, the Leo Pharma logo: a symbolic way to pay homage to an important pharmaceutical company, present in roughly 100 countries.
